## **CNC MACHINING**

At Pro-Type Industries, we leverage top-notch machining techniques to manufacture high-quality metal parts. Our experts use our diverse collection of modern CNC mills and lathes to create custom products for aerospace, defense, and commercial application. Our CNC machining capabilities include 3-axis machining up to 10ft, 4-axis machining up to 40", turning up to 5", and 5-axis machining for the most complex parts.

## **SHEET METAL FABRICATION**

Our wide selection of sheet metal fabrication services is tailor-made to suit your specific applications. Utilizing our diverse catalog of cutting, punching, stamping, bending, and welding, we convert raw sheet metal into your exacting designs with precision tolerances.

## **FINISHING SERVICES**

We provide a full suite of manufacturing solutions from design and development to finished products. Our range of capabilities enables us to deliver end-to-end services from welding, painting, powder coating to complete assembly, laser engraving, custom silkscreen creation, and more. Additionally, as a turnkey manufacturer, we understand final assembly is a critical and complex step of the entire process.
